

## SUMMARY

**Industry:** Safety and Security Products

**Products:**

- ▶ REPULS® Irritant Spray
- ▶ SentiZone™
- ▶ SentiLaunch™
- ▶ SentiPak™

**Our Concept:** Next-generation patented technology solutions for public safety

**Company Status:** Seeking financing to expand REPULS revenue and launch full commercial production of SentiZone, SentiLaunch and SentiPak

**Jody Allen Crowe**

- ▶ High Risk School Administrator
- ▶ Author of "The Fatal Link"
- ▶ International speaker and expert in the field of school shootings

## THE NEED

- ▶ FBI Report: "Calendar Year 2022 saw the highest number of horrific 'active shooter' casualties, deaths, and injuries of the past five years. Data shows an upward trend in such incidents. In more than half of the cases, the shooters had no known connection to the location or its victims."

### Threats Being Encountered In Many Different Venues

- ▶ Active shooters and violence in schools
- ▶ Violence in medical facilities
- ▶ Active shooters and violence in places of worship
- ▶ Violence in casinos
- ▶ Attacks on sea-going vessels
- ▶ Pepper spray has fallen out of favor due to many health and cross-contamination issues

## THE SOLUTION

- ▶ First award-winning chemical irritant to hit the market in decades
- ▶ Revolutionary water-based chemical irritant – not an aerosol spray
- ▶ Induces painful eye irritation and other sensory irritants without permanent injury. Can be sprayed indoors or outdoors
- ▶ Once the perpetrator is disarmed or subdued, it is easy to mitigate the irritation by flushing the face and skin with water

### Accelerating Adoption of REPULS®

- ▶ First and only chemical irritant that is approved to be used inside ambulances, emergency rooms, hospitals, and medical centers as REPULS is target-specific and does not contaminate air handling systems
- ▶ Law enforcement is switching from pepper spray to REPULS
